

For Better Retirement Living

June 30, 2020

To our valued community,

Today Dr. Bonnie Henry announced the province's plan to ease restrictions for visitors to seniors currently in independent living residences and long term care centres. This is good news.

At Augustine House we will be working to implement changes but for the time being all our previous visiting procedures are still in place. Please be assured, once we can make changes we will inform our staff, residents and families.

In the coming days we will be working with our staff to create a plan that follows the provincial guidelines for visiting. We need to carefully examine these guidelines to ensure proper staffing and best practices.

Outdoor visits by appointment are still possible, please continue to wear a mask if you are visiting our property and allow two metres of social distancing. We ask that you not bring food to share or eat while visiting.

Thank you for doing your part and working with us, we will have an updated visiting policy in place next week.

Remember, *please do not visit* if you feel unwell or are experiencing any flu-like symptoms.

We all have an important part to play at this time. I am thankful that we are a strong team!

Blessings,

Jackie Reiners,
Executive Director,
Augustine House
